Comfortable. Efficient. Green.

At **Green Star Energy Solutions** we understand that your house is much more than an investment, it's where you live, your children play and you find comfort. It's home. That's why we are committed to helping you protect your investment by providing you with the peace of mind that your home is comfortable, safe and energy efficient.

High energy bills? Drafty rooms? Ever wonder what you can do about it? As building performance contractors, we take a whole home, scientific approach to evaluate your home's energy efficiency, health, comfort, safety and environmental impact. We provide you with comprehensive, economical and green recommendations for home energy improvements, as well as offering quality installation and advice on financing options.

Problems. Solutions. Results.

All homes, old or new, often experience one or more of the following problems:

- High Energy Bills
- Mold and Mildew
- High or Low Humidity
- Drafty Areas
- Unexplained Dust
- Roof Ice, Attic Condensation
- Excessive Outside Noise
- Frozen Pipes
- Rodents and Insect Infestation

Green Star Energy Solutions will perform an in-home Home Energy Audit utilizing the latest equipment and diagnostic tools and provide you with a comprehensive report detailing all of your home's energy issues. We will offer solutions to increase your home's energy efficiency while reducing costs. Our solutions often include:

- Air Sealing
- Insulation
- Draft and Leak Prevention
- Energy Star Appliances
- Mold and Dust Prevention

Save with a more comfortable, safe and energy-efficient home. **Green Star ENERGY SOLUTIONS**
